

## The Inspire™ Mask

---

# Never again hold your breath for a breath of fresh air

Ambient air is great for saving air supply, but connecting the breathing valve in a hurry carries unnecessary risks. To make sure your mask never fills up with smoke, we installed an air hatch that lets you keep the breathing valve connected at all times and still breathe ambient air at will. The hatch opens through a safe double action release mechanism, and needs just a simple push to close.
